

ngrok 簡介

ngrok 是一個強大的反向代理（Reverse Proxy）工具，它可以將運行在本地開發環境的服務（例如：localhost:3000）安全地暴露到公網，並提供一個公共的 URL（HTTPS）。

這在開發 Webhooks、測試行動裝置存取本地伺服器、或是展示專案原型時非常有用。

為什麼要使用 ngrok ？

- **穿透防火牆與 NAT**：不需要更改路由器設定或開啟連接埠，即可讓外部存取本地服務。
- **HTTPS 支援**：自動提供 SSL/TLS 憑證，確保資料傳輸安全。
- **即時監控**：提供一個 Web 界面（通常在 127.0.0.1:4040），讓你可以檢查所有的 HTTP 請求與回應。

註冊與安裝流程

註冊帳號

1. 前往 [ngrok 官方網站](#)，點擊註冊按鈕。

2. 建議使用 Google 帳號進行註冊，操作較為便捷。

4. 閱讀並接受使用條款後，點擊建立帳號。

5. 多因子驗證（MFA）設定可先跳過，後續可依需求再行開啟。

Multi-factor Authentication

Use an authenticator app like 1Password, Google Authenticator, or Microsoft Authenticator to generate one-time passwords that are used as a second factor when you sign in to ngrok.

Enable or disable MFA at any time in the User Settings page.

Scan the QR code using your authenticator app

Or enter the code below into the authenticator app

Windows

[Choose another platform](#)

Installation

[Microsoft Store](#)

[WinGet via Microsoft Store](#)

[Scoop](#)

[Download](#)

For the most secure experience, use the Microsoft Store to install ngrok. This type of installation is fully supported by Windows, ensuring automatic updates and compatibility with app management tools.

[Microsoft Store Installer](#) 

9. 點擊開啟 Microsoft Store。

10. 點擊「安裝」按鈕，等待安裝完成。

11. 在 Windows 搜尋列中輸入「ngrok」，開啟應用程式。

12. 出現以下畫面即表示安裝成功。

```
C:\Program Files\WindowsApp > ngrok

tcp          start a TCP tunnel
tls          start a TLS endpoint
update       update ngrok to the latest version
version      print the version string

EXAMPLES:
# forward http traffic from assigned public URL to local port 80
ngrok http 80
# port 8080 available at baz.ngrok.dev
ngrok http --url baz.ngrok.dev 8080
# tunnel arbitrary TCP traffic to port 22
ngrok tcp 22
# secure your app with oauth
ngrok http 80 --oauth=google --oauth-allow-email=foo@foo.com

Paid Features:
  ngrok http 80 --url mydomain.com                # run ngrok with your own custom domain
  ngrok http 80 --cidr-allow 2600:8c00::a03c:91ee:fe69:9695/32 # run ngrok with IP policy restrictions
  Upgrade your account at https://dashboard.ngrok.com/billing/choose-a-plan to access paid features

Upgrade your account at https://dashboard.ngrok.com/billing/choose-a-plan to access paid features

Flags:
  -h, --help      help for ngrok

Use "ngrok [command] --help" for more information about a command.

ngrok is a command line application, try typing 'ngrok.exe http 80'
at this terminal prompt to expose port 80.
C:\Windows\System32>
```

設定認證金鑰

13. 返回步驟 8 的頁面，點擊複製按鈕以複製 Authtoken。

[ngrok 設定頁面](#)
